TRAINING SPONSORS

TRAINING TOPICS

Railroad 101: Learn about railroad operations, hazards, and safety rules. Rail hazmat safety and emergency response procedures are reviewed.

Presented by: BNSF Railway

Ammonia Properties & Emergency Response: An overview of anhydrous ammonia, including its chemical and physical properties, placards, labels, containers, tank construction, and the hazards and potential outcomes associated with an anhydrous ammonia incident.

Presented by: Nutrien

Field Exercise 1: This portion of training focuses on familiarization with various valves and fittings on pressure and general service tank cars. Attendees can obtain experience applying the Midland Kit to a DOT 112 housing.
