The Corpus Christi Fire Department is hosting a Union Pacific - TRANSCAER Railcar Emergency Response training event. This training event provides unique insights into best management practices in railroad emergencies and provides first responders with the experience needed to safely respond to and work in today's complex world of hazmat rail emergencies.

**LPG (liquefied petroleum gas) Emergencies** — This year's training will include a LPG Specialist discussing LPG emergencies and proper mitigation techniques. Industrial responders are encouraged to attend.

Participants will learn how to identify railcars, railcar anatomy and how to mitigate railcar incidents including LPG leaks. This is more than a lecture based class, you will get hands on training from some of the best in the profession.

Concepts that will be covered:

- LPG: Properties, Facilities, Incidents, Mitigation
- Mitigation: From a contractors perspective
- Hands on Leak mitigation and Response on protective housings
- Capping Kits, (C-Kit and Midland Kit)
- Flaring set-up for damaged railcars
- Initial duties upon arriving on scene; train lists and RR emergency contact
- Safety when responding/general railroad emergencies
- Recovery procedures and site remediation
- Hazardous materials releases or other environmental incidents

CE hours may be awarded in the following manner;

- Chemical physical properties 1 hrs
- Hazardous Materials Mitigation 2 hrs
- Railroad industry 2 hrs

- **This one day course is free to all participants**
- **Class will run from 9– 3:30 with a (personal) break for lunch at noon**
- **Gloves, hard hat, safety toed boots and eye protection are required**
- **Hand sanitizing stations will be located on the training site**

**TRANSCAER**
